

Executive Summary: Project Status Report for scottyab/rootbeer

Introduction

This report is intended to provide progress on the scottyab/rootbeer project. It will highlight the information of the authors and the dates when they touched each file in the list. The report demonstrates the Weeks vs File the author committed a change. It will be clear to understand how many times each file was touched and by which author.

Findings

So far the majority of the authors have been making meaningful commits. It's important to highlight that Scott Alexander-Bown and Matthew Rollings have made the most amount of commits. This repository has **30 source files**, over **30 authors**, and yet Scott A. and Matthew R. stand out the most during the 300 week period.

Git Command

Upon creating this document I used the github commands **git push**, **git pull**, **git add**, **git commit**, **git checkout**, **git branch** and **git clone**.
